Subject: SPIRIT OF SACRAMENTO; meeting with Port of West Sacramento

Good Morning Harry,

I think you're in Hawaii this week, but Todd Ajari and I are trying to schedule a meeting with all the stakeholders to discuss and finalize a plan for Port of West Sac. Todd spoke with them last week and they are open to having the vessel there with long term removal operations. They have a few stipulations though that I think we need to discuss to identify whether this option is still viable and how we can work around some of the issues (location of work, any fees, etc...).

According to LT Beltran at CoCo County Sheriffs, Rob Delacruz and Lind Marine have both indicated that they can dismantle the vessel (once everything is removed) at the Port.

Todd has also made some headway with CalRecycle in that they are willing to come to the table for discussions but haven't made any promises.

Right now, it's looking like Wednesday morning is the best time, would you be able to call in or have someone attend the meeting in your place?

Thanks again and safe travels!

V/R
